1. Project

Progress

- Learn backend development (Postgresql)
- Meet client for next step's work
- Organize code / Review
- *This week is the first week of Term 2, so all team members are working on the same thing.*

Blockers + Surprises

- Our meeting with the client happens on Fridays, so we haven't had a meeting with the client yet for this week's work

2. Learning Activity

- Learn PSQL for constructing a database this term
- *This week is the first week of Term 2, so all team members are working on the same thing.*

3. Plan

- Continue learning PSQL and other backend techs. Details would be determined after Friday's meeting with the client.

Task for this week:

- Meet with the client
- Divide work evenly
- Determine learning activity for this term
- Continuing learning PSQL

Learning activities proposed for this week:

1. PSQL basics
2. Meet up and redesign meeting schedule for this term
- 3.

Goals for the next milestone:

1. Finish backend
2. Review front end
3. Organize code for merging front and back end.
